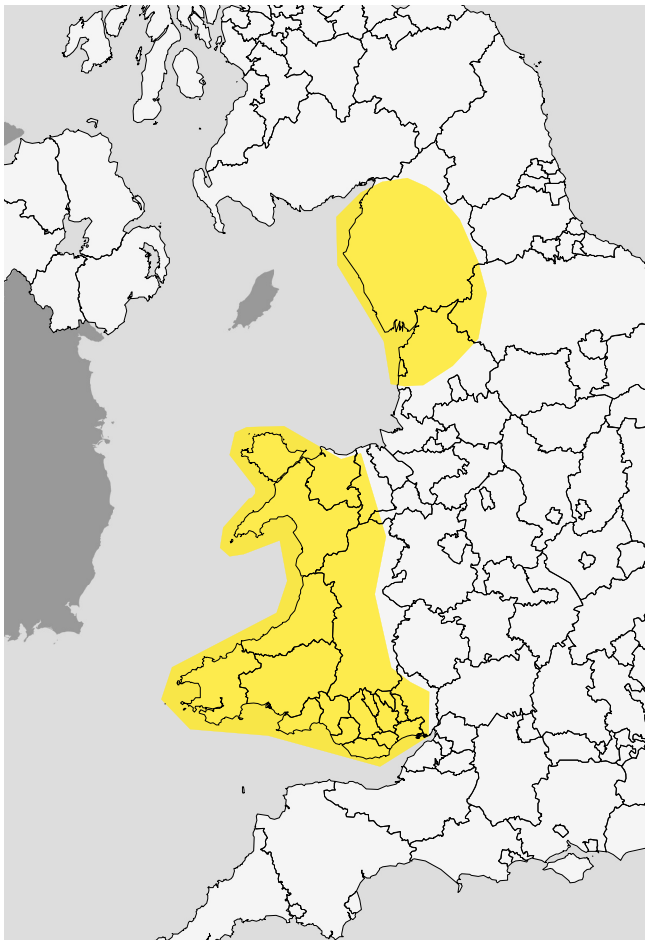
Yellow warning
Rain

Between
06:00 Fri 12 Oct 2018 and
23:59 Fri 12 Oct 2018



A spell of heavy and persistent rain on Friday has the potential to cause some flooding.

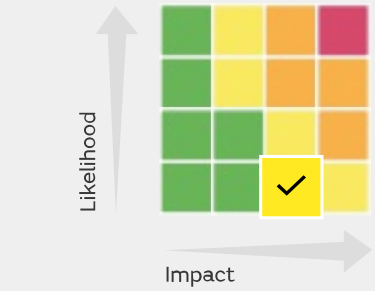
What to expect

- There is a small chance that homes and businesses could be flooded, causing damage to some buildings
- Spray and flooding could lead to difficult driving conditions and some road closures
- Where flooding occurs, there is a slight chance of delays or cancellations to train and bus services
- There is a slight chance of power cuts and loss of other services to some homes and businesses

Further details

A zone of heavy rain associated with an intense weather system affecting western parts of the UK will become slow moving for a time, bringing prolonged rainfall and the potential for surface water flooding. Areas of high ground exposed to the south and south west will be most affected, with the potential for over 60 mm of rain in 12 hours in the most exposed locations, and over 100 mm by the end of the day.

The rain is expected to be accompanied by strong winds, which when combined with high tides may lead to some coastal impacts due to large waves.



Very low likelihood of medium impacts

Issued at 11:20 Tue 9 Oct, 2018

Yellow warning
Rain

Between
06:00 Fri 12 Oct 2018 and
23:59 Fri 12 Oct 2018

Further Details (continued)

In addition, these winds may increase autumnal leaf fall, which would increase the potential for blocked drains and culverts, heightening the flooding risk.
